PROJECTS

Lets Live | <https://github.com/lucy839/lets-live> | <https://github.com/lucy839/lets-live>

- If you are a fan of live music and looking for something to do tonight, where do you go? Let's Live will help you! This app will find live shows that's happening near you and those of your artist using Ticketmaster api and locate them on the map using Leaflet api.
- Lead Frontend Developer focusing on creative design of app and user friendly UI
- JavaScript, jQuery, API, HTML, CSS, Bootstrap, Bideo-JS

Google Book Search | <https://github.com/lucy839/googleBookSearch.git> | <https://immense-river-48976.herokuapp.com/>

- This is a React-based Google Books Search app, which creates React components, works with helper/util functions, and utilizes React lifecycle methods to query and display books based on user searches.
- Full stack web developer. Built the app from the scratch; frontend to backend
- JavaScript, Mongo, Express, React, Node, API

Barter Bud | <https://github.com/lucy839/Project2> |

<https://secure-headland-57611.herokuapp.com/>

- Bartering is a tradition as old as time itself. In this modern age, we have lost touch with this basic root of human civilization. Barter Bud allows users to create a SECURE profile where they could upload pictures of items or offering services that They would like to trade and could interact and make offers with other users for trading said items or services WITHOUT using money.
- Product Manager and all around. Main job was on middle ware to grab data from user and store it to database and display back on the app. Helped in frontend, passport, and other organizations of tasks.
- JavaScript, clouinary, handlebars, passport-JS, mySQL
